I/c Head,

**Dr. K. N. Nandurkar**

Principal

Dept. of MCA

## **Abstract**

Temple Pass System is web-based application which helps temple administration to store the data of users (devotees), manage devotee's donation and manage Darshan Pass booking. The system is also intended to provide better services to users (devotees) provide meaningful, consistent, and timely data and information and finally promotes efficiency by converting paper processes to electronic form. The system was developed using basic technologies such as MySQL database and PHP. The system is free of errors and very efficient and less time consuming due to the care taken to develop it. All the phases of software development cycle are employed and it is worthwhile to state that the system is user friendly and strong. Provision is made for future development in the system.

## **Introduction**

**Temple Pass System** is software which is helpful for temple administrator and devotees. In the current system all the activities are done manually. It is very time consuming and costly. Our Temple Pass System deals with the various activities related to the temple and devotees.

The two main users involved in this system are

1. Users (i.e., Devotees)
2. Admin

In the Software users(devotees) can register themselves by the authentication code i.e email id or mobile number and password with help of email id or mobile number devotees can login his/her account and view all the information which is announced by admin.

### **Purpose of the System:**

The objective of **Temple Pass System** is to allow the administrator of any temple to edit and find out the personal details of devotees and allows the devotees to keep the data up to date, donate the amount and make booking of the darshan online. It'll also facilitate keeping all the records of devotee, such as their name, mailing address, and phone number. So all the information about a devotees will be available in a few seconds. Administration makes the report of donation collection in particular period in a particular temple. Overall, it'll make Temple Pass System an easier job for the administrator and the devotees.

### **Advantages:**

- It helps the temple administrator to handle and manage devotee's records.
- It helps temple administrator to generate report.
- It brings transparency and efficiency in the working of Temple Pass System.
- Simple user interface to reduce operation time.
- Reduce the data entries lead to eliminate chances of error and reduce operator efforts.
- The system handles multiple temple organization.

### **Applications:**

The website **Temple Pass System** is aimed towards recording a considerable number of devotee records, darshan booking and donation which is all handle by single administration. Website should be user-friendly, ‘quick to learn’ and reliable website for the above purpose. **Temple Pass System** is intended to be a stand-alone product and should not depend on the availability of other website. The system will also have an administrator who has full-fledged rights with regards to performing all actions related to control and management of the website.

## **Feasibility Study**

Whenever we design a new system, normally the management will ask for a feasibility report of the new system. The management wants to know the technicalities and cost involved in creation of new system.

- Technical feasibility
- Economic feasibility
- Physical feasibility

### **Technical feasibility:**

Technical feasibility involves study to establish the technical capability of the system being created to accomplish all requirements to the user. The system should be capable of handling the proposed volume of data and provide users and operating environment to increase their efficiency.

For example, system should be capable of handling the proposed volume of data and provide users.

### **Economic feasibility:**

Economic feasibility involves study to establish the cost benefit analysis. Money spent on the system must be recorded in the form of benefit from the system. The benefits are of two types:

#### **Tangible benefits:**

- Saving man labor to do tedious tasks saves time.

#### **Intangible benefits:**

- Improves the quality of temple organization.

### **Physical feasibility:**

It involves study to establish the time responses of the new system being created. For e.g., if the new system takes more than one day to prepare crucial finance statement for the management, wherever it was required in an hour, the system fails to provide the same.

It should be clearly established that the new system requirements in the form of time responses would be completely met with. It may call for increase in cost. If the required cost is sacrificed then the purpose of the new system may not be achieved even if it was found to be technically feasible.

## **Scope of the Project**

Temple Pass System is web-based application which help temple administration to store the data of users (devotees), manage devotee's donation and manage darshan booking.

Temple Pass System Software is web-based application which automate the charitable trusts that run and maintain temple organizations. The challenges addressed include integrating modules to manage donations, devotee's database and festivals. The software is built to be an easy to use interface and the navigation is simple. We have also integrated modules to generate relevant reports.

All possible features such as verification, validation, security, user friendliness etc. have been considered.

The different types of modules present in this project are

1. Admin
2. Users (Devotees)

### **Admin:**

1. **Dashboard:** In this section, admin can see all detail in brief like Total new darshan booking, accepted darshan booking, rejected darshan booking, total donation, total temple and total festivals.
2. **Temple:** In this section, admin can manage temple (Add/Update/Delete).
3. **Festivals:** In this section, admin can manage the festivals (Add/Update/Delete).
4. **Darshan Booking:** In this section, the admin can manage darshan booking and update the status of booking.
5. **View Donation:** In this section, the admin can view the donation detail and print the receipt.
6. **Reports:** In this section admin, can generate the following reports in a particular period
  - Darshan booking: In this section, admin can generate the between dates reports of darshan booking
  - Reports of Donation: In this section, admin can generate the between dates reports of donation.
  - Collected Donation: In this section, admin can generate the report of amount which is collected in a particular temple.
  - Registered devotees: In this section, admin can generate the between dates reports of devotees who registered themselves with temple organization.

7. **Pages:** In this section admin, can manage about us and contact us page of administration
8. **Search:** In this section admin, can search following details.
  - Darshan booking: In this section, admin can search booking detail by booking number.
  - Donation Receipt: In this section, admin can search booking detail by donation number(receipt number).
  - **Reg Devotees:** In this section, admin can search booking detail by mobile number.
9. **Registers Devotees:** In this section, admin can view the detail of registered devotees.

Admin can also update his profile, change the password and recover the password.

#### **User (Devotees):**

1. **Home:** It is welcome page for devotees.
2. **Donation History:** User can view donation history.
3. **Darshan History:** User can view darshan history and darshan booking status.
4. **Profile:** User can update his/her profile.
5. **Change Password:** User can change the password of their account.
6. **Logout:** User can logout from website.
7. **Our Festivals:** User can view all the festivals which is celebrated in the temples.
8. **Temples:** User can view the temple detail, send the donation and book darshan.
9. **About:** User can view about us page.
10. **Contact:** User can view contact us page.

#### **User (Non-Register Devotees):**

1. **Home:** It is welcome page for user.
2. **About:** User can view about us page.
3. **Contact:** User can view contact us page.
4. **Our Festivals:** User can view all the festivals which is celebrated in the temples.
5. **Temples:** User can view the temple detail.

## **Software & Hardware Requirements**

### **Hardware requirements:**

- Any processor after Pentium 4.
- Any version of Windows XP or later.
- Processor speed: 2.0 GHz
- RAM : 1GB
- Hard disk: 40GB to 80 GB

### **Software requirements:**

- Database : MySQL
- Server : Apache
- Frontend : HTML
- Scripting Language : JavaScript
- IDE : Eclipse for PHP /Sublime
- Technology : PHP
- Any Version of browser after Mozilla Firefox 4.0, Internet Explorer 6.0, chrome

## **System Design**

Design is the first step in the development phase for any techniques and principles for the purpose of defining a device, a process or system in sufficient detail to permit its physical realization.

Once the software requirements have been analyzed and specified the software design involves three technical activities - design, coding, implementation and testing that are required to build and verify the software.

The design activities are of main importance in this phase, because in this activity, decisions ultimately affecting the success of the software implementation and its ease of maintenance are made. These decisions have the final bearing upon reliability and maintainability of the system. Design is the only way to accurately translate the customer's requirements into finished software or a system.

Design is the place where quality is fostered in development. Software design is a process through which requirements are translated into a representation of software. Software design is conducted in two steps. Preliminary design is concerned with the transformation of requirements into data

### **Unified Modelling Language Diagrams (UML):**

- The unified modelling language allows the software engineer to express an analysis model using the modelling notation that is governed by a set of syntactic semantic and pragmatic rules.
- A UML system is represented using five different views that describe the system from distinctly different perspective. Each view is defined by a set of diagram, which is as follows.

#### **User Model View**

- i. This view represents the system from the user's perspective.
- ii. The analysis representation describes a usage scenario from the end-users perspective.

## **Structural model view**

- In this model the data and functionality are arrived from inside the system.
- This model view models the static structures.

## **Behavioural Model View**

- It represents the dynamic of behavioural as parts of the system, depicting the interactions of collection between various structural elements described in the user model and structural model view.

## **Implementation Model View**

- In this the structural and behavioural as parts of the system are represented as they are to be built.

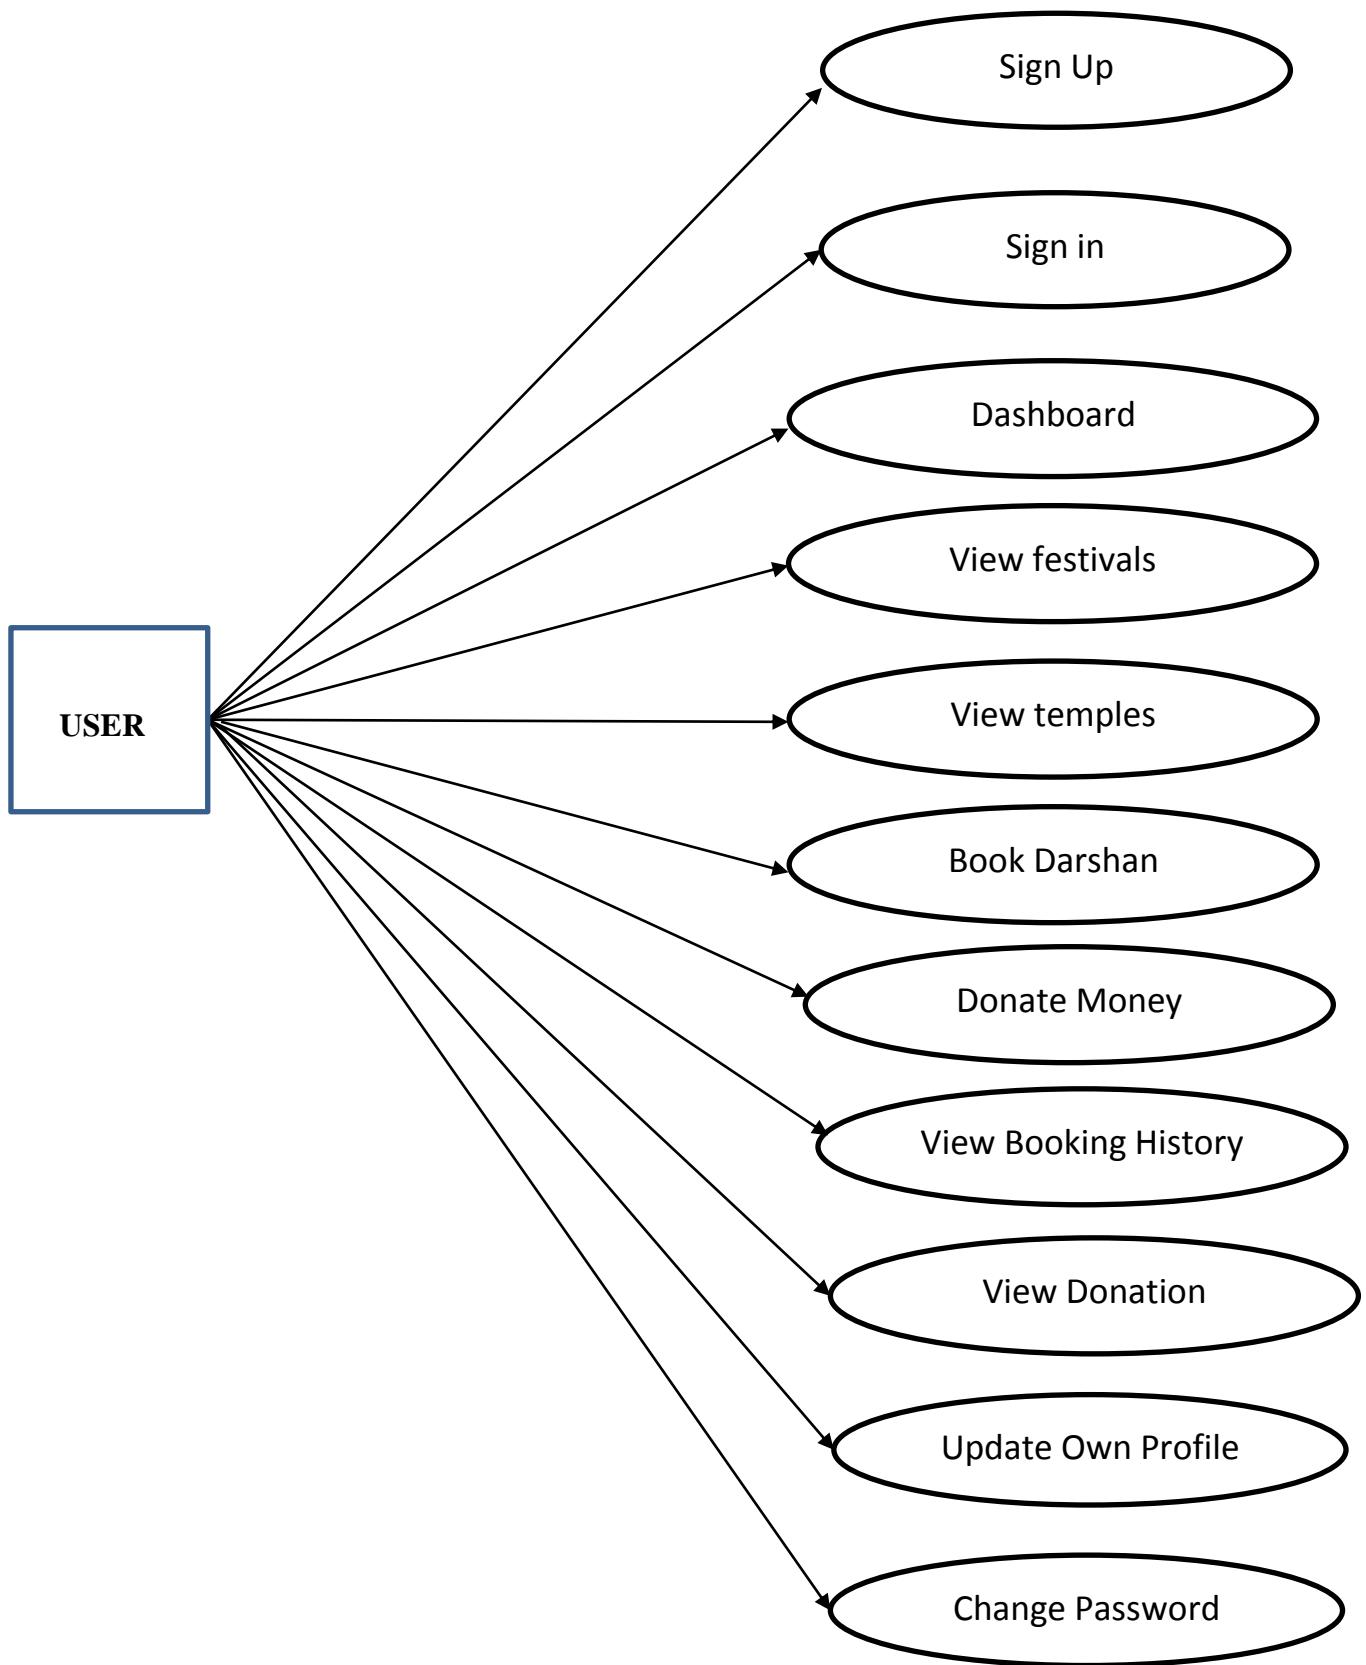

## **Environmental Model View**

In this the structural and behavioural aspects of the environment in which the system is to be implemented are represented.

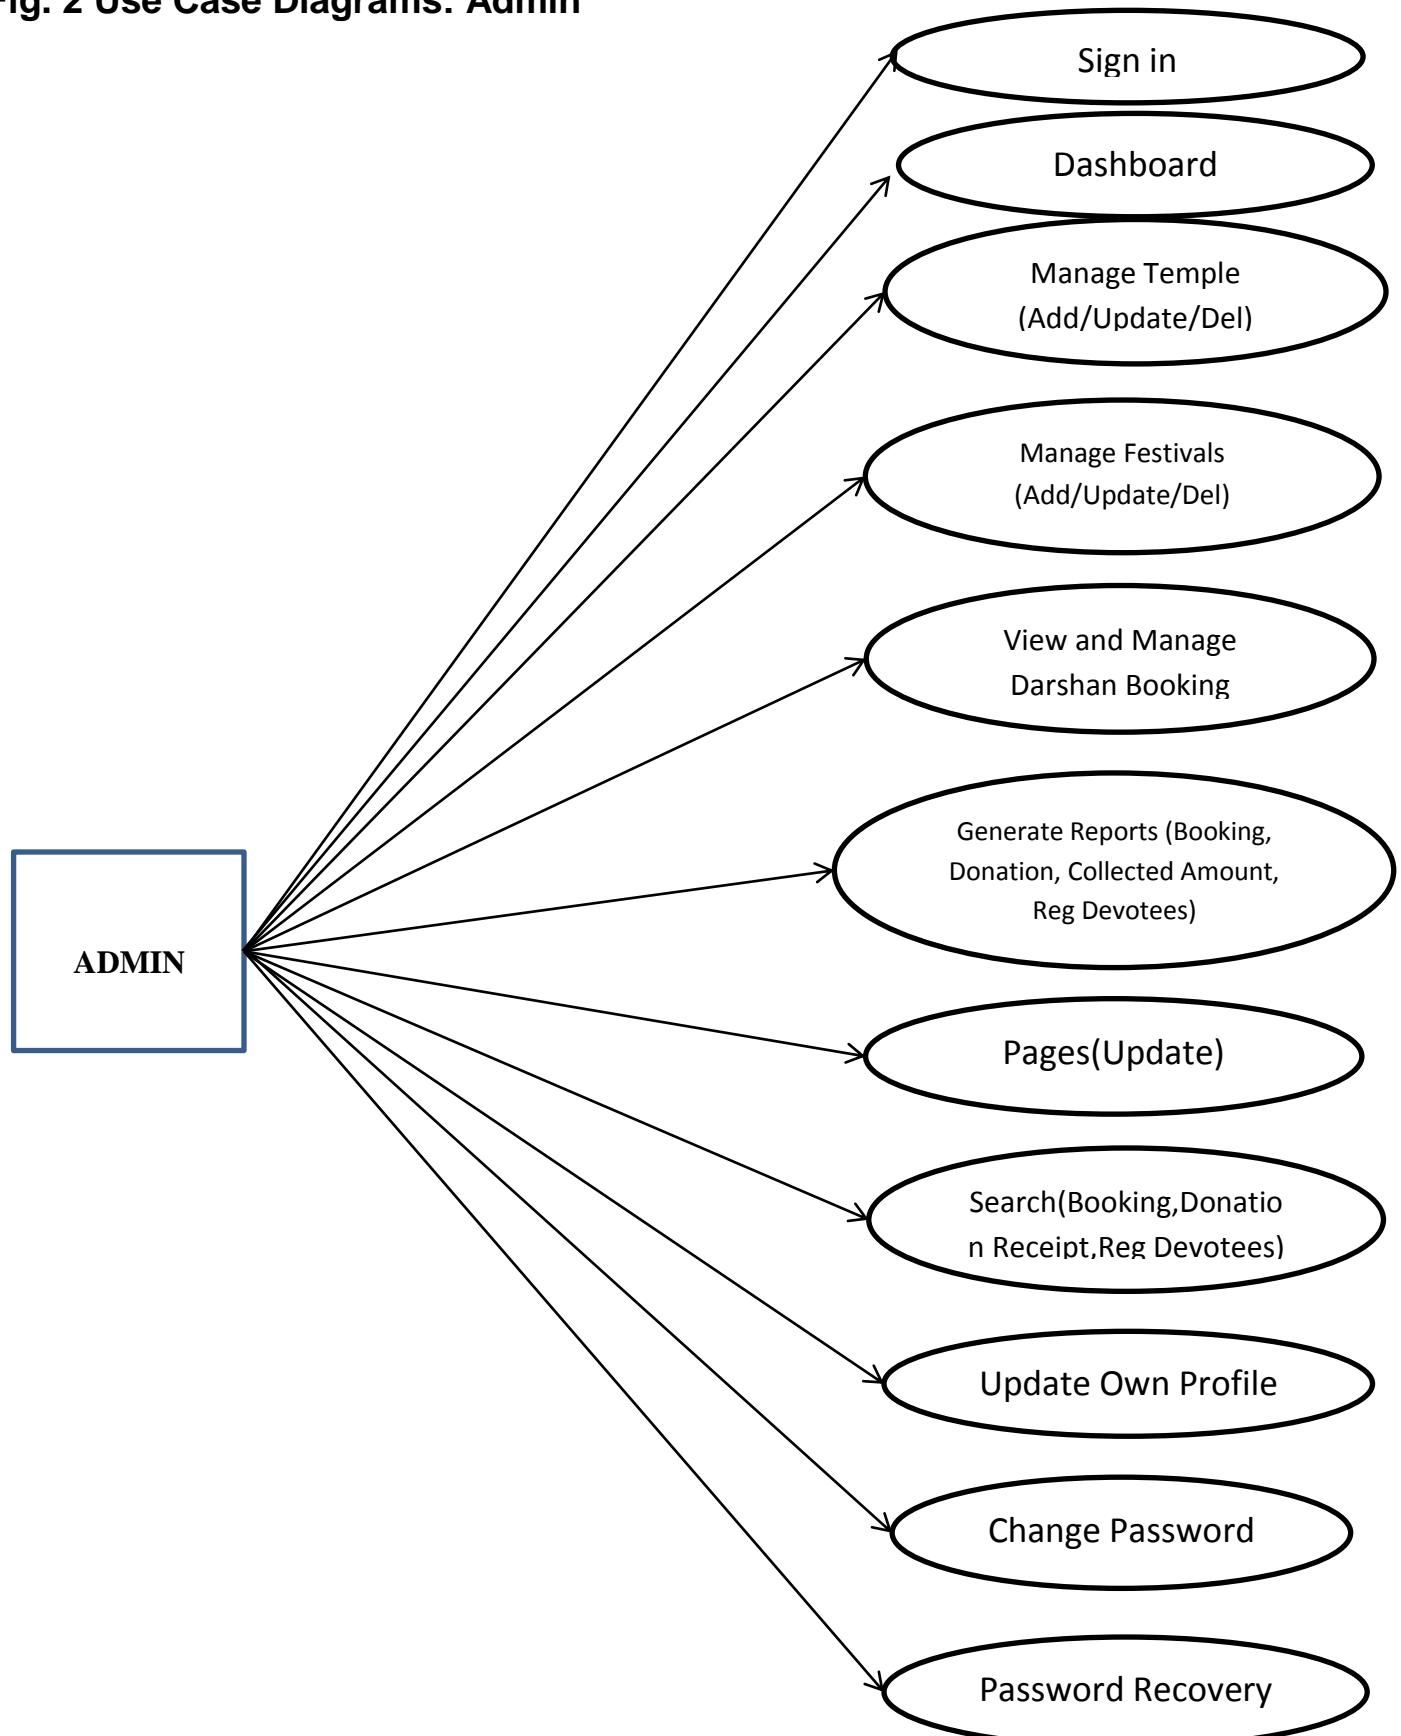

UML is specifically constructed through two different domains they are

- UML Analysis modelling, which focuses on the user model and structural model views of the system?
- UML design modelling, which focuses on the behavioural modelling, implementation modelling and environmental model views.

**Fig. 1 Use Case Diagrams: User**

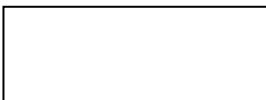

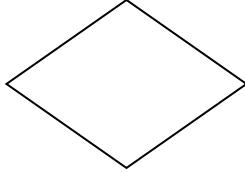

**Fig. 2 Use Case Diagrams: Admin**

### **Fig. 3 Entity-Relationship Diagram Shapes**

E-R (Entity-Relationship) Diagram is used to represents the relationship between entities in the table.

**The symbols used in E-R diagrams are:**

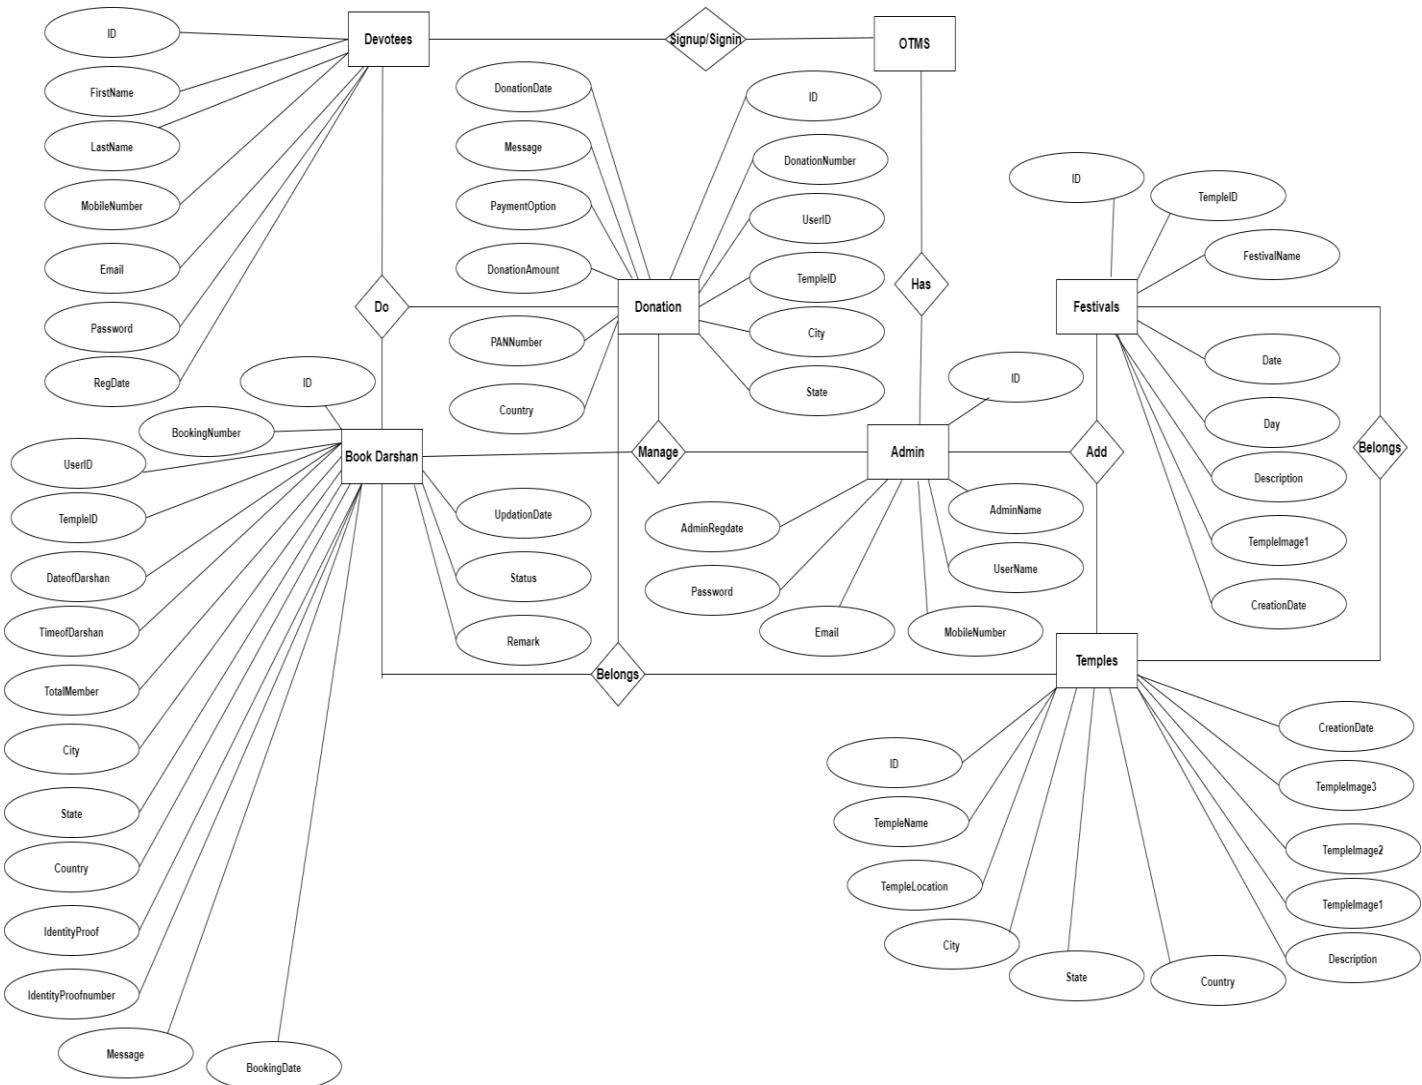

<u>SYMBOL</u>	<u>PURPOSE</u>
	Represents Entity sets.
	Represent attributes.
	Represent Relationship Sets.
<hr/>	Line represents flow

Structured analysis is a set of tools and techniques that the analyst.

To develop a new kind of a system:

The traditional approach focuses on the cost benefit and feasibility analysis, Project management, and hardware and software selection a personal consideration.

**Fig. 4 Entity-Relationship Diagram**

## **Data Flow Diagram**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It can be manual, automated, or a combination of both.

It shows how data enters and leaves the system, what changes the information, and where data is stored.

The objective of a DFD is to show the scope and boundaries of a system as a whole. It may be used as a communication tool between a system analyst and any person who plays a part in the order that acts as a starting point for redesigning a system. The DFD is also called as a data flow graph or bubble chart.

### **The following observations about DFDs are essential:**

1. All names should be unique. This makes it easier to refer to elements in the DFD.
2. Remember that DFD is not a flow chart. Arrows is a flow chart that represents the order of events; arrows in DFD represents flowing data. A DFD does not involve any order of events.
3. Suppress logical decisions. If we ever have the urge to draw a diamond-shaped box in a DFD, suppress that urge! A diamond-shaped box is used in flow charts to represents decision points with multiple exists paths of which the only one is taken. This implies an ordering of events, which makes no sense in a DFD.
4. Do not become bogged down with details. Defer error conditions and error handling until the end of the analysis.

Standard symbols for DFDs are derived from the electric circuit diagram analysis and are shown in fig:

Symbol	Name	Function
	Data flow	Used to Connect Processes to each other, to sources or Sinks; the arrow head indicates direction of data flow.
	Process	Performs Some transformation of Input data to yield output data.
	Source of Sink (External Entity)	A Source of System inputs or Sink of System outputs.
	Data Store	A repository of data; the arrow heads indicate net inputs and net outputs to store.

**Symbols for Data Flow Diagrams**

**Fig. 5 Symbols for Data Flow Diagrams**

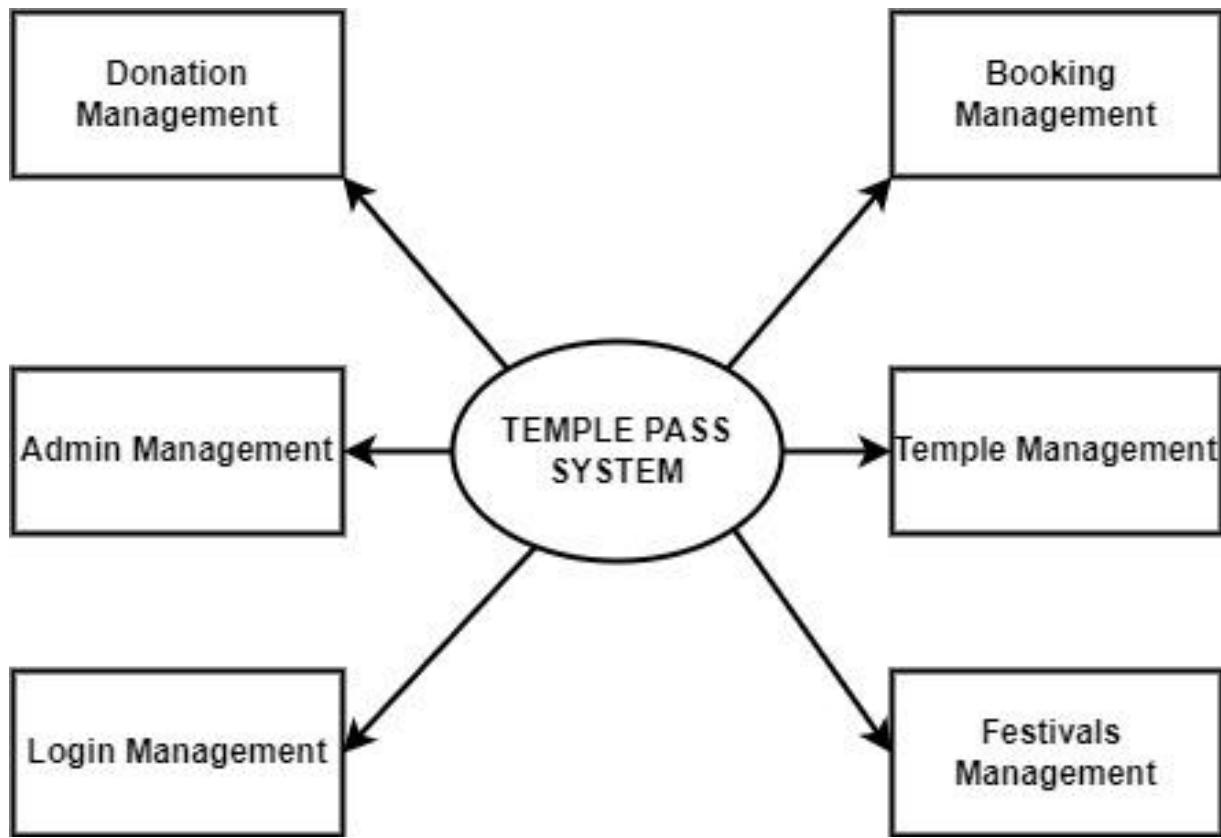

**Circle:** A circle (bubble) shows a process that transforms data inputs into data outputs.

**Data Flow:** A curved line shows the flow of data into or out of a process or data store.

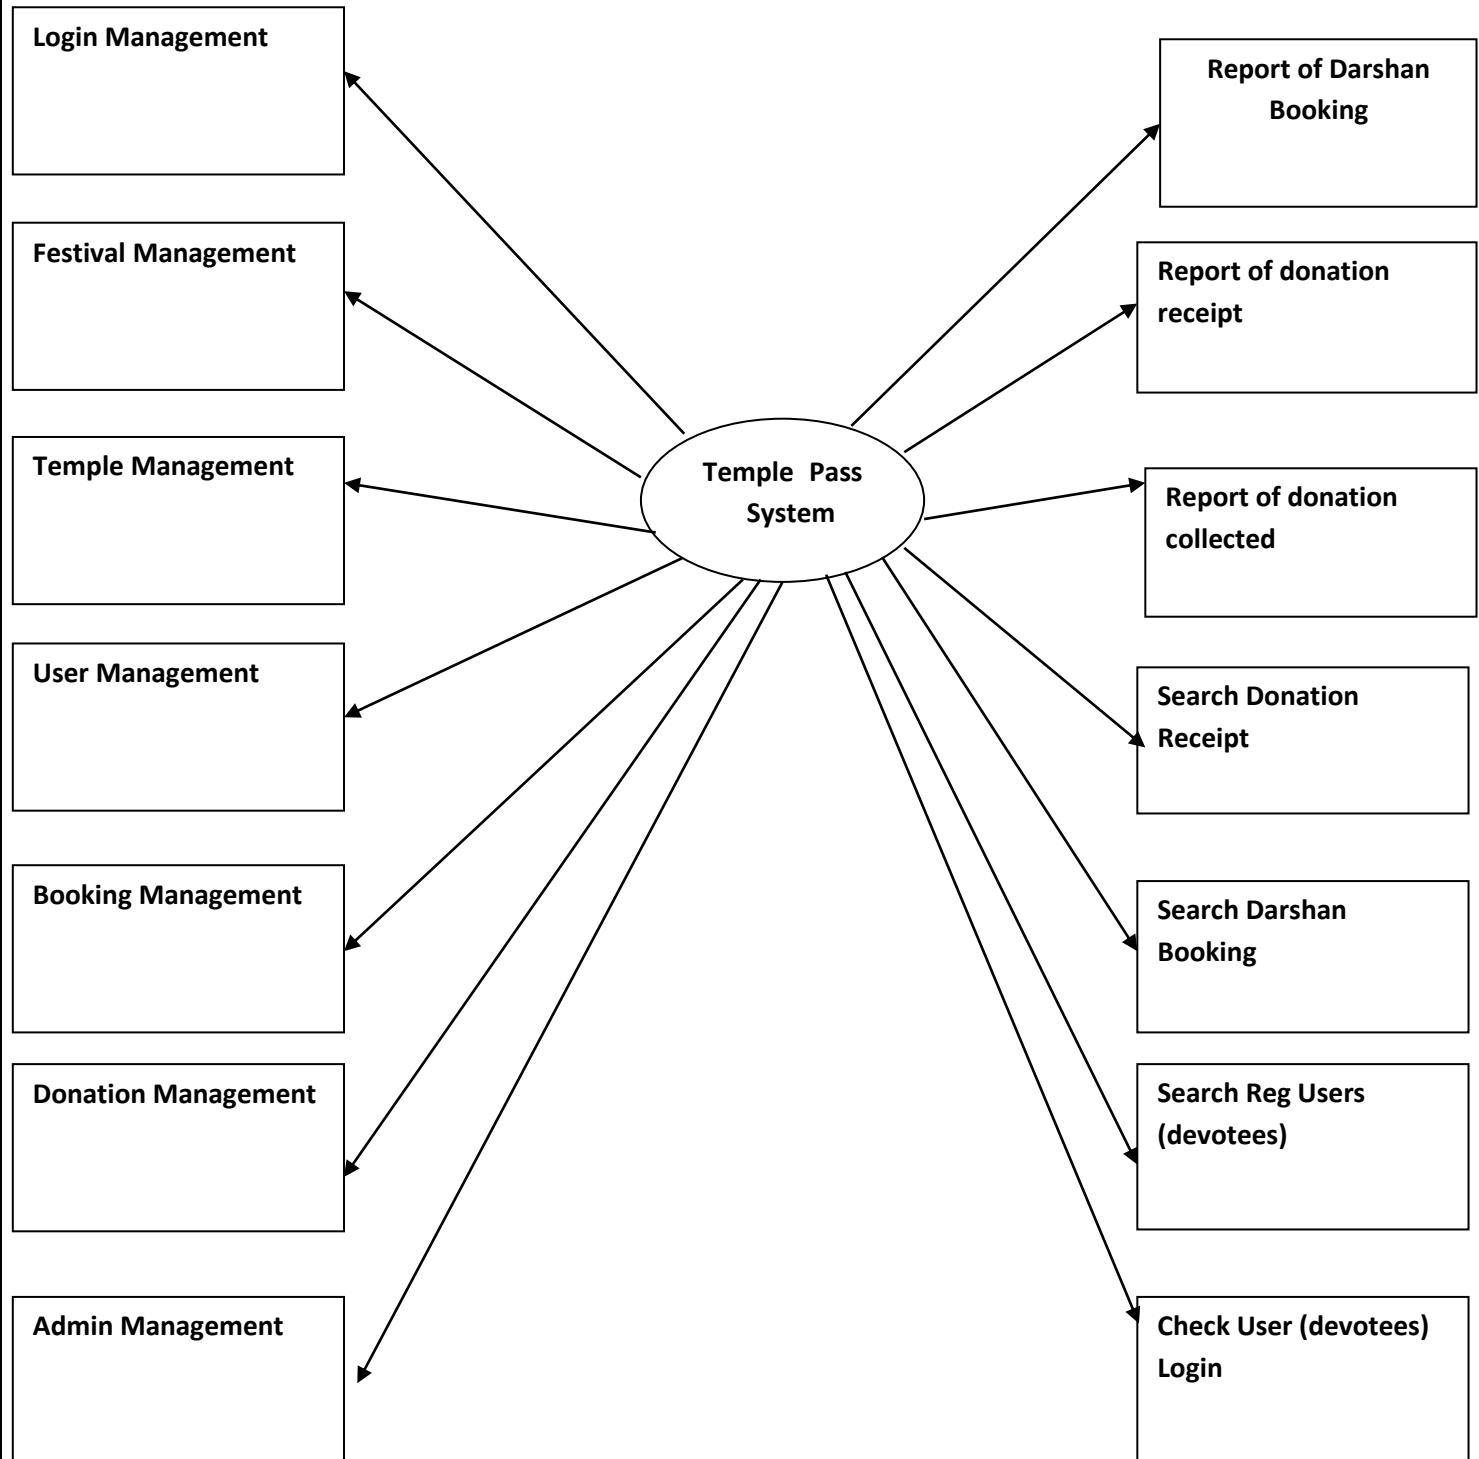

**Data Store:** A set of parallel lines shows a place for the collection of data items. A data store indicates that the data is stored which can be used at a later stage or by the other processes in a different order. The data store can have an element or group of elements.

**Source or Sink:** Source or Sink is an external entity and acts as a source of system inputs or sink of system outputs.

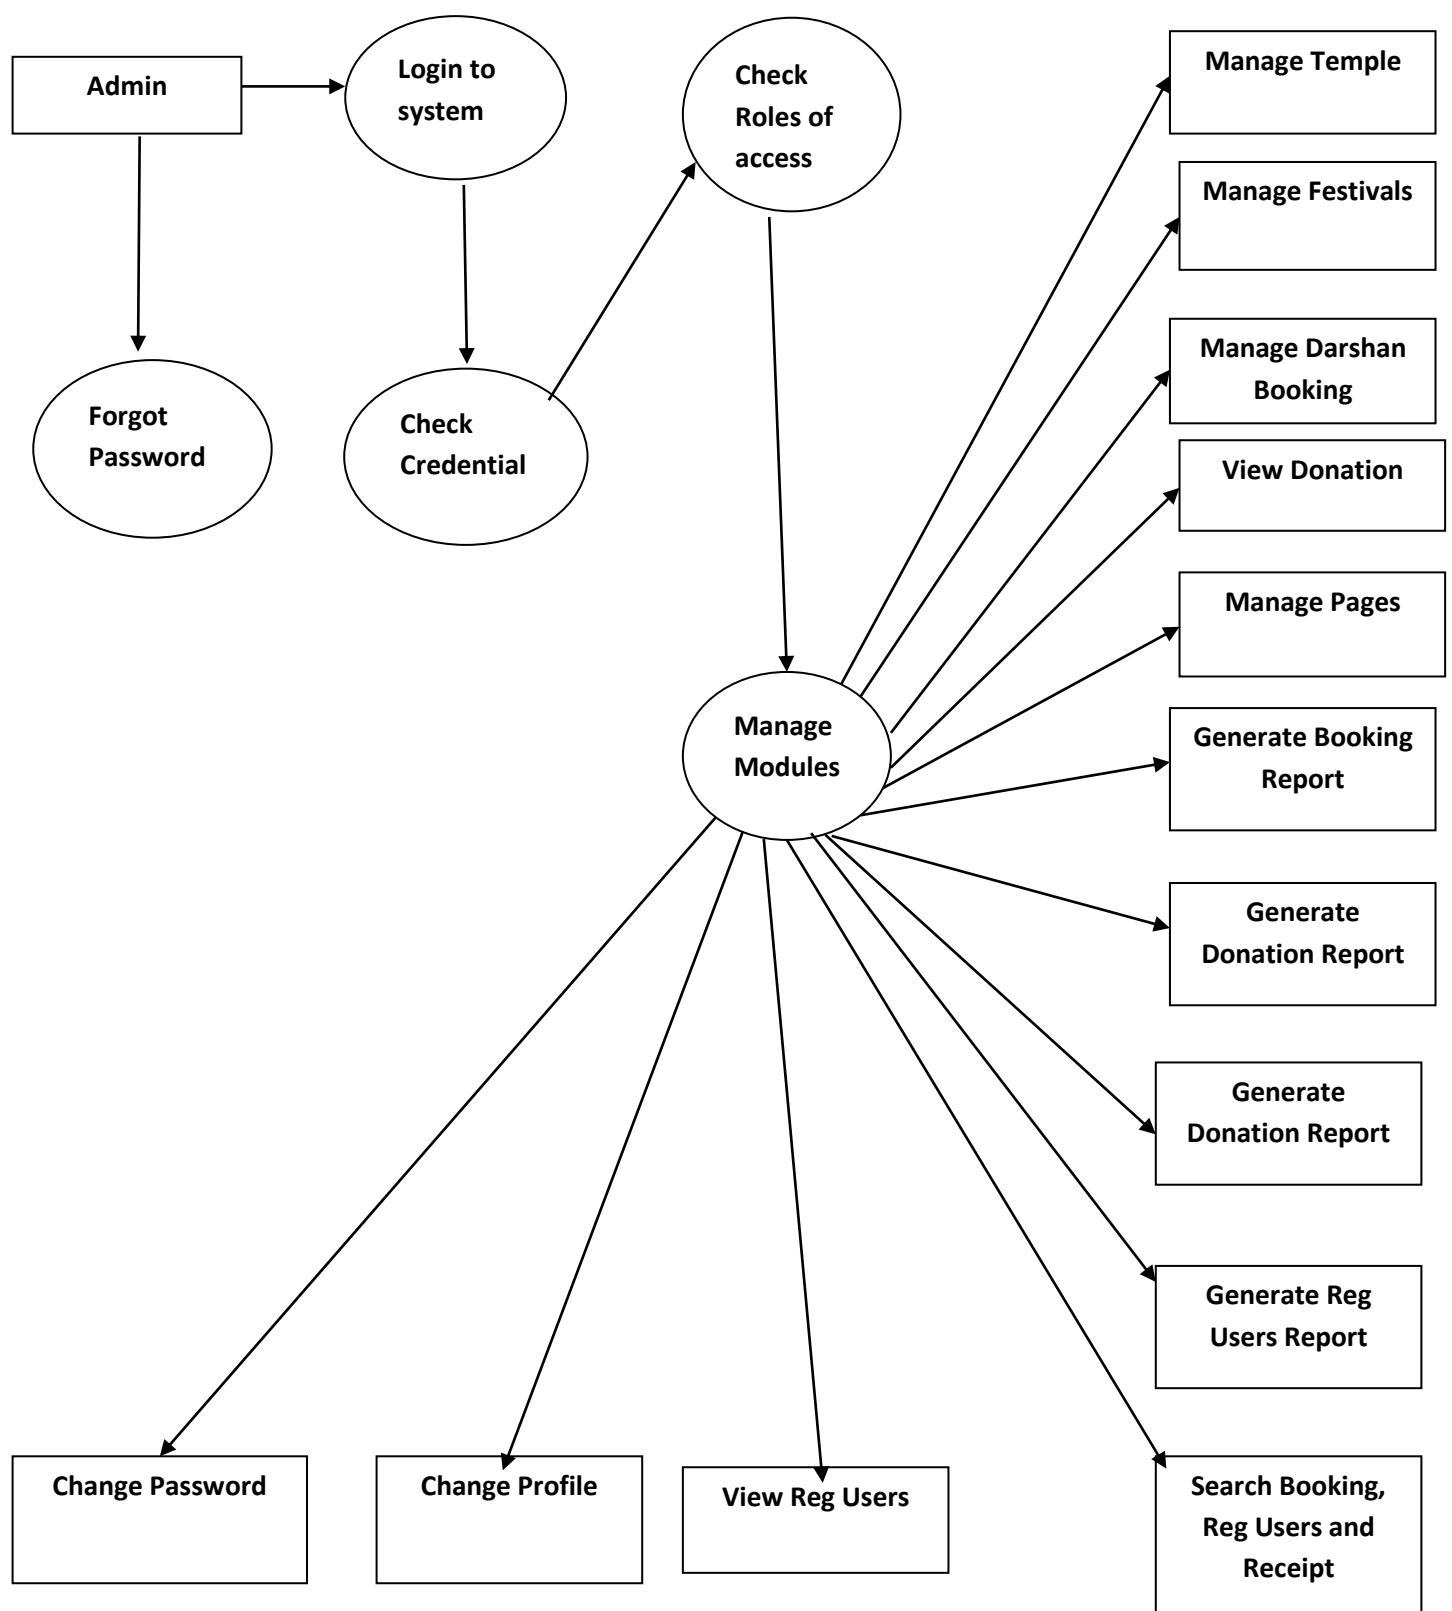

**Fig. 6 Zero Level DFD**

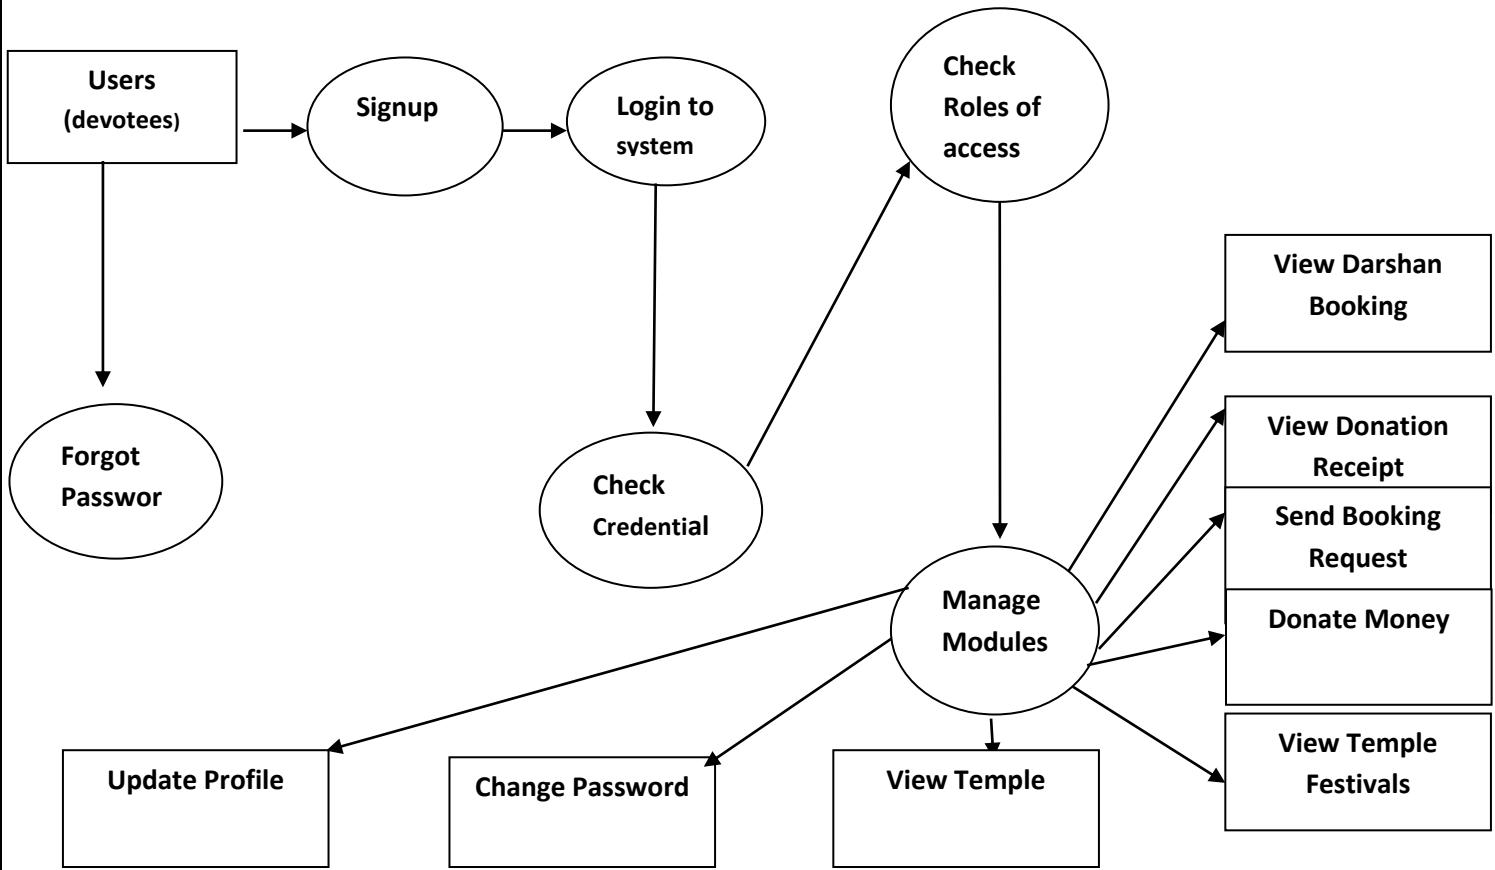

**Fig. 7 First Level DFD**

**Fig. 8 Second Level DFD**

## Database Design

The data in the system has to be stored and retrieved from database. Designing the database is part of system design. Data elements and data structures to be stored have been identified at analysis stage. They are structured and put together to design the data storage and retrieval system.

A database is a collection of interrelated data stored with minimum redundancy to serve many users quickly and efficiently. The general objective is to make database access easy, quick, inexpensive and flexible for the user. Relationships are established between the data items and unnecessary data items are removed. Normalization is done to get an internal consistency of data and to have minimum redundancy and maximum stability. This ensures minimizing data storage required, minimizing chances of data inconsistencies and optimizing for updates. The MySql database has been chosen for developing the relevant databases.

**Temple Pass System (TPS) contains 7 MySQL tables:**

**Table 1: tbladmin table Structure:** This table stores the admin login and personal Details.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(10)			No	None		AUTO_INCREMENT
2	AdminName	varchar(120)	utf8mb4_general_ci		Yes	NULL		
3	UserName	varchar(120)	utf8mb4_general_ci		Yes	NULL		
4	MobileNumber	bigint(10)			Yes	NULL		
5	Email	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	Password	varchar(200)	utf8mb4_general_ci		Yes	NULL		
7	AdminRegdate	timestamp			Yes	current_timestamp()		

**Table 2: tblbookdarshan table Structure:** This table stores the darshan booking details of devotees.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	<b>ID</b> 	int(5)			No	None		AUTO_INCREMENT
2	<b>BookingNumber</b>	int(10)			Yes	NULL		
3	<b>UserID</b>	int(5)			Yes	NULL		
4	<b>TempleID</b>	int(5)			Yes	NULL		
5	<b>DateofDarshan</b>	date			Yes	NULL		
6	<b>TimeofDarshan</b>	time			Yes	NULL

## Class Diagram:

The class diagram shows a set of classes, interfaces, collaborations and their relationships.

*Fig. 9 Class Diagram*

## **System Testing**

### **SOFTWARE TESTING TECHNIQUES:**

Software testing is a critical element of software quality assurance and represents the ultimate review of specification, designing and coding.

### **OBJECTIVES:**

1. Testing is process of executing a program with the intent of finding an error.
2. A good test case design is one that has a probability of finding an as yet undiscovered error.
3. A successful test is one that uncovers an as yet undiscovered error.

These above objectives imply a dramatic change in view port.

Testing cannot show the absence of defects, it can only show that software errors are present.

There are three types of testing strategies

1. Unit test
2. Integration test
3. Performance test

### **Unit Testing:**

Unit testing focuses verification efforts on the smallest unit of software design module. The unit test is always white box oriented. The tests that occur as part of unit testing are testing the module interface, examining the local data structures, testing the boundary conditions, execution all the independent paths and testing error-handling paths.

### **Integration Testing:**

Integration testing is a systematic technique or construction the program structure while at the same time conducting tests to uncover errors associated with interfacing. Scope of testing summarizes the specific functional, performance, and internal design characteristics that are to be tested. It employs top-down testing and bottom-up testing methods for this case.

### **Performance Testing:**

Timing for both read and update transactions should be gathered to determine whether system functions are being performed in an acceptable timeframe.

## Test Cases

**Table 8: Test Cases**

Test case ID	Test case Objective	Prerequ isite	Steps	Input Data	Expected Output	Actual Output	Status
Tc_01	Test case for regis ter user	All fields in the form are mandat ory to fill.	1. Click on new_her e? get involved . 2. Regis ter yourself . 3. ## FESTIVALS:

Date: 2022/08/10  
Day: Sunday

 [NEW HERE? GET INVOLVED.](#)

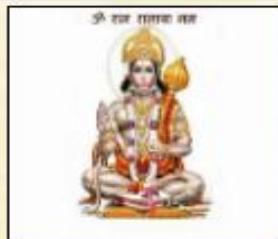

**Temple Pass System**

[HOME](#) | [OUR FESTIVALS](#) | [TEMPLES](#) | [ABOUT](#) | [CONTACT](#) | [ADMIN](#)

**FESTIVALS**

FESTIVAL NAME	GANESHA CHATURTHI
	<a href="#">Temple</a> <a href="#">Ganesha Temple</a>
Date	2022-08-31
Day	Wednesday
Description	Ganesha Chaturthi, also called Vinayaka Chaturthi, is a Hindu festival marking the birth of the elephant-headed deity Ganesha, the god of prosperity and wisdom. It begins on the fourth day (chaturthi) of the month of Bhadrapada (August–September), the sixth month of the Hindu calendar.

FESTIVAL NAME	MAHA SHIVRATRI
	<a href="#">Temple</a> <a href="#">Trimbakeshwar Temple</a>
Date	2022-03-18
Day	Sunday
Description	Maha Shivratri (IAST: Maṭaśīrāṭrī) is a Hindu festival celebrated annually in honour of the god Shiva. The name also refers to the night when Shiva performs the heavenly dance called Tandava.

FESTIVAL NAME	HANUMAN JAYANTI
	<a href="#">Temple</a> <a href="#">Hanuman Temple</a>
Date	2022-04-08
Day	Thursday
Description	Hanuman Jayanti is a Hindu religious festival that celebrates the birth of Hindu God Hanuman, who is highly venerated throughout India and Nepal. This festival is celebrated on different days in different parts of India.

### TEMPLES

#### TRIMBAKESHWAR TEMPLE

NASHIK (MAHARASHTRA), INDIA

Trimbakeshwar Temple is a religious centre having one of the twelve Jyotirlingas. The city of Trimbakeshwar is located at the foot of Brahmagiri hill, height of which is 3000 feet above sea level. Trimbakeshwar Temple is maintained by Trimbakeshwar Temple Trust. They have constructed Shivprasad Bhakta Niwas which is having 24 rooms (2 bedded, 3 bedded, 5 bedded), conference hall, lift, hot water facilities.

[Darshan Booking](#) [Donation](#)

#### SHIRDI SAI TEMPLE

NAHSIK (MAHARASHTRA), INDIA

The Sai Baba temple in Shirdi is managed by the Shri Sai Baba Sansthan Trust. Inside the temple, the statue of Sai Baba and the Samadhi are carved out of Italian marble and is seen draped with royal cloth, wearing a gold crown and adorned with fresh flower garlands. The interior is made of old stone bricks. The interior, as well as the exterior (cone) of the temple, is covered with gold. As per rituals and traditions dating back to when Baba was still alive, four Aartis are held daily (corresponding to the time of the day) inside the Samadhi Mandir.

[Darshan Booking](#) [Donation](#)

#### HANUMAN TEMPLE

NASHIK (MAHARASHTRA), INDIA

Anjaneri, one of the forts in the mountain range of Nasik-Trimbakeshwar, is considered to be the birthplace of god Hanuman. Anjaneri is located 20 km away from Nasik by Trimbak Road. It has become a famous trekking spot for local Nashikites, specially in the rainy season.

ABOUT US

**- Temple Pass System -**

The objective of Temple Pass System is to allow the devotees to keep the data up to date, donate the amount and make booking of the darshan online. It'll also facilitate keeping all the records of devotee, such as their name, mailing address, phone number. So all the information about a devotee will be available in a few seconds. Administration makes the report of donation collection in particular period in a particular temple.

The Temple has brought the priest from all of India to oversee the daily rituals. The first few years have been most generally spent in maintaining the buildings and a dependable schedule of religious .

## Accepted Booking

The screenshot shows the 'Accepted Booking' section of the 'Temple Pass System'. The left sidebar has a dark blue background with white text and icons. It includes sections for Dashboard, Temple, Festivals, Darshan Booking (with sub-options: New Booking, Accepted Booking, Rejected Booking, All Booking), View Donation, Reports, Search, Pages, and Reg Devotees. The main content area has a light gray header with the text 'Welcome back, Admin' and a small profile icon. Below this is a banner featuring a traditional temple building with yellow roofs against a blue sky. The main table is titled 'All Darshan Booking' and has columns for #, Booking Number, Temple Name, Darshanarthi(Devotee) Name, Darshanarthi(Devotee) Email, Darshanarthi(Devotee) Mobile Number, Status, and Action. Two rows of data are shown:

#	Booking Number	Temple Name	Darshanarthi(Devotee) Name	Darshanarthi(Devotee) Email	Darshanarthi(Devotee) Mobile Number	Status	Action
1	62058865	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<button>View</button>
2	382710103	GanpatiPule Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<button>View</button>

At the bottom of the table, there are navigation links: Previous, 1, Next.

## View Accepted Booking

The screenshot shows the 'View Accepted Booking' page of the 'Temple Pass System'. The left sidebar is identical to the one in the previous screenshot. The main content area has a light gray header with the text 'Welcome back, Admin' and a small profile icon. Below this is a banner featuring a traditional temple building with yellow roofs against a blue sky. The main table is titled 'Darshan Booking Details' and has columns for Temple Name, Temple Country, Temple Location, Temple Image, Temple State, Temple City, and Temple Description. The table shows data for Hanuman Temple located in India, Maharashtra, Nasik, and Ajyani Hill. The 'Temple Description' row contains a detailed paragraph about Ajyani Hill.

Temple Name	Hanuman Temple		Temple Image			
Temple Country	India	Temple State	Maharashtra	Temple City	Nasik	
Temple Location	Ajyani Hill	Temple Description	Ajyani, one of the forts in the mountain range of Nasik Trimbakeshwar, is considered to be the birthplace of god Hanuman. Ajyani is located 20 km away from Nasik by Trimbak Road. It has become a famous trekking spot for local Nasikites, especially in the rainy season.			

Below the table, there are two sections: 'Detail of Devotee' and 'Detail of Darshans'.

**Detail of Devotee:**

Darshanarthi(Devotee) Name	chetan pawar	Darshanarthi(Devotee) Email	cpawar@gmail.com
Darshanarthi(Devotee) Mobile Number	7030144284	Darshanarthi(Devotee) Reg Date	2022-07-01 12:24:01

**Detail of Darshans:**

Date of Darshan	2022-08-04	Time of Darshan	04:00:00			
Total Member	2	City of Devotee	Nashik	State of Devotee	Maharashtra	
Country of Devotee	India	Identity Proof of Devotee	Adhar Card	Identity Proof Number	0	
Message	book for 2 persons for darshan		Booking Date	2022-07-03 12:45:00	Darshan Status	Darshan request has been accepted

## Donation

The screenshot shows the 'View Donation' section of the dashboard. At the top, there's a banner with the text 'Welcome back, Admin' and a user icon. On the right, it shows the time as '01:13:26'. Below the banner, a table lists three donations:

#	Receipt Number	Donated Temple name	Donar Name	Donar Email	Donar Mobile Number	Action
1	114796199	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
2	560401791	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
3	674443688	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>

At the bottom of the table, there are navigation links: 'Previous', '1', and 'Next'.

## View Donation Detail

The screenshot shows the 'View Donation Detail' section. It displays a 'Donation Receipt' for a donation to 'Hanuman Temple'. The receipt includes the following details:

Receipt Number	114796199	Date	2022-07-03 12:46:20
Name	chetan pawar	Mobile Number	7030144284
Email	cpawar@gmail.com	PAN Number	esic5165
City	Nashik	State	Maharashtra
Country	India	Message	for development
Payment Amount	15000	Payment Method	Cash

At the bottom right of the receipt area, there is a 'Print' button.

## Darshan Booking Report

The screenshot shows the 'Temple Pass System' interface. On the left is a dark blue sidebar menu with navigation items: Dashboard, Temple, Festivals, Darshan Booking, View Donation, Reports (with sub-items: Darshan Booking, Reports of Donation, Collected Donation, Reports of Reg Devotee), Search, Pages, and Reg Devotees. The main content area has a header 'Welcome back, Admin' and a sub-header 'Between Dates Report Of Darshan Booking'. It includes two input fields for 'From Dates' and 'To Dates' (both labeled 'dd-mm-yyyy') and a purple 'Submit' button.

## View Detail of Booking Report

This screenshot shows the same 'Temple Pass System' interface as above, but the main content area displays a table titled 'Between Dates Report Of Darshan Booking From 02-07-0022 To 05-12-2023'. The table has columns: #, Booking Number, Temple Name, Darshanarthi(Devotee) Name, Darshanarthi(Devotee) Email, Darshanarthi(Devotee) Mobile Number, Status, and Action. Two rows of data are shown:

#	Booking Number	Temple Name	Darshanarthi(Devotee) Name	Darshanarthi(Devotee) Email	Darshanarthi(Devotee) Mobile Number	Status	Action
1	620588865	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<a href="#">View</a>
2	382710103	Ganpatipule Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<a href="#">View</a>

At the bottom of the table, there are links for 'Previous', '1', and 'Next'.

## Report of Donation

The screenshot shows the 'Temple Pass System' dashboard. On the left, a dark blue sidebar menu lists navigation items: Dashboard, Temple, Festivals, Darshan Booking, View Donation, Reports (selected), Darshan Booking, Reports of Donation, Collected Donation, Reports of Reg Devotee, Search, Pages, and Reg Devotees. The main content area has a banner image of a temple. At the top right, it says 'Time: 01:22:25'. Below the banner, a welcome message 'Welcome back, Admin' is displayed. A form titled 'Between Dates Report Of Donation Of Devotee' contains fields for 'From Dates' (dd-mm-yyyy) and 'To Dates' (dd-mm-yyyy), both with clear buttons. A purple 'Submit' button is at the bottom.

## View detail of report of donation

The screenshot shows the 'Temple Pass System' dashboard. The sidebar menu is identical to the previous screenshot. The main content area displays a table titled 'Between Dates Report Of Donation From 02-07-2022 To 08-05-2023'. The table has columns: #, Receipt Number, Donated Temple name, Donar Name, Donar Email, Donar Mobile Number, and Action. Three rows of data are shown:

#	Receipt Number	Donated Temple name	Donar Name	Donar Email	Donar Mobile Number	Action
1	114796199	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
2	560401791	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
3	674443688	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>

At the bottom of the table, there are links for 'Previous', '1', and 'Next'.

## Report of Collected Donation

The screenshot shows the 'Temple Pass System' dashboard. On the left, a dark blue sidebar menu lists various navigation options: Dashboard, Temple, Festivals, Darshan Booking, View Donation, Reports (with sub-options like Darshan Booking, Reports of Donation, Collected Donation, and Reports of Reg Devotee), Search, Pages, and Reg Devotees. The main content area has a header 'Welcome back, Admin' and a sub-header 'Collected Donation Amount'. It contains two input fields for 'From Dates' and 'To Dates', both labeled 'dd-mm-yyyy'. Below these is a purple 'Submit' button. In the top right corner, there is a timestamp 'Time: 01:23:14' and a user profile icon labeled 'Admin'.

## View Collected Amount

This screenshot displays the 'Donation Collected Amount Report' from July-2022 to May-2023. The report table is as follows:

S.NO	Temple Name	Donation Amount
1	Hanuman Temple	15000
2	Shirdi Sai Temple	20000
Total		35000

The interface is identical to the one in the first screenshot, featuring the same sidebar menu and header elements.

## Report of Registered Devotees

The screenshot shows the 'Temple Pass System' dashboard. On the left, a navigation sidebar lists various modules: Dashboard, Temple, Festivals, Darshan Booking, View Donation, Reports (with sub-options like Darshan Booking, Reports of Donation, Collected Donation, and Reports of Reg Devotee), Search, Pages, and Reg Devotees. The main content area features a banner with a traditional temple image and the text 'Welcome back, Admin'. Below the banner is a form titled 'Between Dates Report Of Registered Devotees'. It includes two date input fields ('From Dates' and 'To Dates') and a 'Submit' button.

## View Details of Registered Devotees

This screenshot shows the results of the report query from the previous screen. The main content area displays a table header for the 'Between Dates Report Of Registered Devotees From 02-07-2022 To 12-12-2023'. The table has columns for '#', 'Darshanarthi(Devotee) Name', 'Darshanarthi(Devotee) Email', 'Darshanarthi(Devotee) Mobile Number', and 'Registration Date'. Below the table, there are navigation links labeled 'Previous', '1', and 'Next'.

## Search Darshan Booking

The screenshot shows the 'Temple Pass System' interface. On the left is a dark blue sidebar with navigation links. The main area has a banner of a temple. It displays a search bar for 'Darshan Booking by Booking no / Name / Mobile no.' and a search button. Below is a table titled 'Result against "7030144284" keyword' with columns: #, Booking Number, Temple Name, Darshanarthi(Devotee) Name, Darshanarthi(Devotee) Email, Darshanarthi(Devotee) Mobile Number, Status, and Action. Two entries are shown:

#	Booking Number	Temple Name	Darshanarthi(Devotee) Name	Darshanarthi(Devotee) Email	Darshanarthi(Devotee) Mobile Number	Status	Action
1	620588865	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<button>View</button>
2	382710103	Ganpatipule Temple	chetan pawar	cpawar@gmail.com	7030144284	Accepted	<button>View</button>

## Search Donation Receipt

The screenshot shows the 'Temple Pass System' interface. The sidebar and main layout are identical to the previous screenshot, featuring a banner of a temple. It includes a search bar for 'Search Receipt By Donation no / Name / Mobile No.' and a search button. Below is a table titled 'Result against "7030144284" keyword' with columns: #, Receipt Number, Donated Temple name, Donar Name, Donar Email, Donar Mobile Number, and Action. Three entries are shown:

#	Receipt Number	Donated Temple name	Donar Name	Donar Email	Donar Mobile Number	Action
1	114796199	Hanuman Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
2	560401791	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>
3	674443688	Shirdi Sai Temple	chetan pawar	cpawar@gmail.com	7030144284	<button>View</button>

## Search Devotees

The screenshot shows the 'Temple Pass System' interface. On the left, a dark blue sidebar lists navigation options: Dashboard, Temple, Festivals, Darshan Booking, View Donation, Reports, Search, Pages, and Reg Devotees. The main area has a banner with a temple image and the text 'Welcome back, Admin'. A search bar at the top says 'Search Devotee By Name / Mobile no.' Below it is a 'Search' button. A table titled 'Result against "7030144284" keyword' displays one row of data:

#	Darshanarthi(Devotee) Name	Darshanarthi(Devotee) Email	Darshanarthi(Devotee) Mobile Number	Registration Date
1	chetan pawar	cpawar@gmail.com	7030144284	2022-07-01 22:24:01

## About Us Page

The screenshot shows the 'About Us' page editor. The sidebar includes options for About Us and Contact Us under the Pages section. The main content area has a banner with a temple image and the text 'Welcome back, Admin'. It features a 'Page Title' field containing 'About Us' and a 'Page Description' rich text editor. The editor contains the following text:

**Temple Pass System**

The objective of Temple Pass System is to allow the allows the devotees to keep the data up to date, donate the amount and make booking of the darshan online. It'll also facilitate keeping all the records of devotee, such as their name, mailing address, phone number. So all the information about a devotee will be available in a few seconds. Administration makes the report of donation collection in particular period in a particular temple.

The Temple has brought the priest form all of India to oversee the daily rituals. The first few years have been most generally spent in maintaining the buildings and a dependable schedule of religious .the objective of Temple Pass System

At the bottom is a 'Submit' button.

## **Conclusion**

The project titled as **Temple Pass System** was deeply studied and analyzed to design the code and implement. It was done under the guidance of the experienced project guide. All the current requirements and possibilities have been taken care during the project time.

**Temple Pass System** can be used by temple administration to maintain the records of devotees, donation and darshan booking easily. Achieving this objective is difficult using a manual system as the information is scattered, can be redundant and collecting relevant information may be very time consuming. All these problems are solved using this project

## **Acknowledgment**

I am grateful to my entire faculties who have contributed in inspiring and clarifying my thought over the years; Prof. M. E. Maniyar and many other faculty of K. K. Wagh Institute of Engineering College. Special gratitude I give to my respected head of the department of MCA Prof. V. C. Bagal, for allowing me to use the facilities available and also help me to coordinate my project. I am thankful well-wishers and my family for spiritual, moral and even financial support. Thanks also to the entire staff of my College, Furthermore; I would also like to acknowledge with much appreciation the crucial role of faculty members on this occasion. Last but not least, I would like to thank friends who help me to assemble the parts and gave a suggestion about the project. Finally, Honor and glory to the highest God for having enabled me successfully accomplished.
